

Welcome to a More Convenient Tolling System

DARS

The new DarsGo system will apply to all vehicles with the maximum permissible weight over 3.5 tonnes, while all other vehicles will remain part of the existing vignette system.

 VINJETA REPUBLIKA SLOVENIJA ≤ 3,5 t NDM 	 DarsGo > 3,5 t NDM
--	--------------------------------------

When a heavy vehicle passes a toll gantry, the latter will detect the DarsGo unit in the vehicle using microwave technology, which will provide the basis for charging toll for a particular tolling section.

As of 1 April 2018, Slovenia will introduce a modern, free-flow electronic tolling system on motorways and expressways for vehicles with the maximum permissible weight over 3.5 tonnes (heavy vehicles). Drivers of heavy vehicles will no longer stop at toll stations. Your travels will therefore be faster, safer and more comfortable.

Pay-As-You-Drive

As of 1 April 2018, all vehicles with the maximum permissible weight over 3.5 tonnes (heavy vehicles) will start paying tolls in the new free-flow electronic tolling system called DarsGo.

The Slovenian motorway network will only be open to heavy vehicles that are registered in the system and equipped with a DarsGo unit, which cannot be transferred from one vehicle to another. The DarsGo system will calculate tolls fully automatically based on the distance driven.

Simple and Transparent Tolling

Users of the DarsGo system will no longer pay tolls at each toll station.

Instead, you will be able to choose one of the simpler ways to settle tolls:

- PRE-PAID, using the credit on the vehicle account that

you deposit at a 'DarsGo servis' with cash, fuel card, or payment card or at www.darsgo.si using your payment card or based on an online offer by transferring money to Dars's transaction account;

- POST-PAID, based on a contract with Dars or by connecting the vehicle account with the selected fuel card.

Become a User of the DarsGo System

Mandatory company and vehicle registration in the DarsGo system can be done:

- at www.darsgo.si: register your company and vehicles, print out the completed form and pick up your DarsGo unit at a 'DarsGo servis' upon presenting the form and paying the administrative fee;
- directly at a 'DarsGo servis', where you also pick up your DarsGo unit upon paying the administrative fee.
- companies in the European Union may complete the entire registration procedure and order placement for a DarsGo unit online, while paying the administrative fee by payment card and receiving the DarsGo unit by mail free of charge.

To register a vehicle in the DarsGo system, simply present your vehicle registration certificate and your proof of EURO emission class.

The administrative fee for each DarsGo unit is €10.

DarsGo units will be available at seven 'DarsGo servis' offices as of November and, as the beginning of the year 2018, at 'DarsGo servis' partners at petrol stations along the motorway network (see map).

The DarsGo unit will register the vehicle registration number and EURO emission class, and the toll class will be specified by the driver before each trip with respect to the number of vehicle axles.
